

AIBridge - Product Requirements Document (PRD)

Product Vision

AIBridge is an AI Adoption Platform that helps small and medium businesses evaluate their AI readiness, identify automation opportunities, create AI-powered support assistants, and continuously improve their AI implementation.

Instead of only providing chatbots, AIBridge acts as an AI onboarding and adoption partner.

Problem Statement

Many businesses know AI is important but lack:

- AI engineers
- AI consultants
- Technical teams
- Knowledge of implementation strategies

As a result, businesses struggle to:

- Understand where AI can help
- Identify automation opportunities
- Deploy AI solutions
- Maintain AI systems

This creates an AI Adoption Gap.

AIBridge bridges this gap through automated analysis, recommendations, and deployment tools.

Target Users

Primary Users

Small and Medium Businesses

Examples:

- SaaS companies
- Agencies
- E-commerce stores

- Educational institutions
 - Consulting firms
 - Local businesses
-

Core Value Proposition

AIBridge helps businesses:

- Understand AI readiness
 - Discover AI opportunities
 - Build knowledge bases
 - Deploy AI support assistants
 - Track AI performance
-

MVP Goals

Build a working platform that can:

1. Analyze a business website
 2. Process uploaded documents
 3. Generate a knowledge base
 4. Generate AI Readiness Reports
 5. Create AI-powered support assistants
 6. Provide basic analytics
-

User Journey

- Product documentation
- Company profiles

Step 5: AIBridge analyzes:

- Website
- Documents
- Business category

Step 6: AI Readiness Report generated.

Step 7: AI chatbot generated.

Step 8: Business embeds chatbot.

Step 9: Analytics collected.

MVP Features

Authentication

- Register
- Login
- JWT Authentication

Business Profile

- Company Name
- Industry
- Website URL
- Company Description

Website Analysis

Extract:

- Pages
- FAQs
- Services
- Products
- Contact Information

Document Processing

Support:

- PDF
- DOCX
- TXT

Knowledge Base

Store:

- Website content
- Document content
- Metadata

AI Readiness Audit

Generate:

- Readiness Score
- Business Summary
- AI Opportunities
- Automation Suggestions
- Estimated Benefits

Chatbot Generator

Generate:

- Business-trained chatbot
- Embeddable widget

Analytics Dashboard
